Welcome

Welcome to The Everwild Wiki

The Everwild is a modded SMP, featuring over 80 different mods running on Fabric 1.20.1. Our community also has a Discord server for the community to plan and play together. Membership in The Everwild SMP is currently invite only, with limited invite opportunities available for current members.

This site features an overview of all the information you'd need to know as a member of the server. If you'd like to contribute to this wiki, please reach out to the team and we'll get you access!

Wiki Navigation

The wiki is built on a platform called [Bookstack](#), so the easiest way to think about the content on the site is like a collection of books. You can always navigate to the list of Books (or Shelves, though I'm not currently using that feature) in the top navigation bar.
